Dear Rising Middle School Students and Parents,

In an effort to minimize a loss in math skills over the summer, the summer math "packet" will be assigned through IXL. Students will be required to work throughout the summer to complete the assignment. In addition, students will have immediate feedback on their answers, with instructions on how to correctly complete the problem.

We have entered assignments into IXL for your child to complete. These assignments are based on MAPS testing and skills that are necessary to succeed in math next year. Students will access these skills the same way they do during the school year. The assignments are visible when your child logs onto IXL.

## Expectations:

- We expect your child to spend 40 minutes per week on IXL this summer for seven of the ten weeks (June 12 - August 20). You may choose to skip the three weeks that best fit your schedule.
- It is preferable that this be done in two sittings ( 20 minutes one day and 20 minutes another).
- This will count as the first grade in math in the 2023-2024 school year.
- Your child's progress will be monitored. We will send out an email midsummer if your child is not working on this assignment.

If you have questions or concerns, please contact Mrs. Long mlong@stambroseschool.org. Thank you for your cooperation and have a great summer.

Sincerely,

Middle School Math Teachers
