

Math is EVERYWHERE Project

For the project,

- **students must think of a place that they see or use math in the real world.**
- **They may choose one of our brainstorming topics or use their own.**
- **Take a tile, pencil, ruler, and colored pencils (crayons or markers) to show how you see math in your topic.**
- **On the back of the tile, they must write at least three sentences describing what they choose and how math is seen in their topic.**
- **Don't forget to write your name.**
- **Due Friday, August 27th.**
