

Dear Parents,

Some Math ideas for the summer:

- Practice telling time by the hour, half-hour, using a digital or face clock.
- Practice counting coins up to \$1.00.
- Practice measuring length to the nearest inch and centimeter.
- Practice measuring volume (cup, pint, quart, etc).
- Practice more, less, fewer, greater than, less than, equal to.
- Practice concept of one fourth, one third, and one half through drawing , paper, etc.
- Practice addition, subtraction, and, fact families, both horizontally and vertically.

There are many Grade 1 Math books that are available for sale at Target, Wal-Mart, and Borders that would be helpful to keep your child's Math skills sharp during the summer. There will also be Performance Assessment and Enrichment pages left in your child's Math work book that can be completed during the Summer.
